T was one of the great objects of 'Waldie's Library. oto make good reading cheaper, and to bring litera-ture to every man's door. That object has been ac-complished; we have given to books wings, and they have flown to the uttermost parts of our vast continent carrying society to the secluded, occupation to the lite-rary, information to all. We now propose still further to reduce prices, and render the access to a literary banquet more than two fold accessible; we gave and shall continue to give in the quarto library a volume weekly for two cents a day; we now propose to give a volume in the same period for less than four cents a teeck, and to add as a piquant seasoning to the dish a few columns of shorter literary matter, and a summary of the news and events of the day. We know by experience and calculation that we can go still further in the matter of reduction, and we feel that there is still verge enough for us to aim at offering to an increasing literary appetite that mental food which it graves.

RETURNS OF VOTES.

We notice that several towns and plantations have neglected to make returns of the votes given at the September election. Instances of such neglect occur every year, and we hope that the rigid enforcement of the penalty of fifty dollars imposed by law, will induce the proper officers to attend to this business. When the people have sacrificed their time and taken the trouble to attend meeting for the purpose of solecting their public officers, they may well feel indignant that their efforts should be for Yun Buren and 735 Available. The countries may well feel indignant that their efforts should be for Yun Buren and 735 Available. duties of their office or pay the penalty.

In our own county we have received no additional returns since our last. In this State the majority will be from six to eight thousand. In New Hampshire the democratic vote will be still stronger. Massachusetts will go for Webster as was expected. Vermont for Harrisont. We hope to be able in this paper to give our 1300. readers the means of judging whether Van Buren is cleated or not.

In our last week's paper we commenced some remarks on some articles that have recently appeared in the Eastern Republican, relative to the control exercised over the Banks in this State by the allied Banks in Boston. We intended to have added that we have not sufficiently attended to the details of banking to be fully assured that, this Suffolk influence is wholly injurious to this State or whether it affects the Banks rather than the people. We do not know that it is beneficial to either, & if it is not, it is humiliating that we should submit to it. The length of the articles in question and the little interest that is felt in this county has hitherto deterred us from publishing them. We have no objection to making Kennebec probable maj. public the exposure of the injurious effects of the control exercised over our Banks by the allied Banks at Boston. We hope that the Legislature will give the subject the attention which it deserves, and provide a remedy for any evil which may exist.

Some fifteen or eighteen mouths ago when our whole State was rife with land-speculation, when thousands of dollars and tens of thousands were made daily on paper, by those who were engaged in this business, the more prudent foresaw or at least predicted, the pressure that must ensue in the money market when the bubble should there is nothing so strange or calamitous in all this as to auspicious. ure for the want of money.
